Professional experience

2018 - 2021 : Fullstack web developer in the startup habla.pro

- Used **python**, **django**, and **postgreSQL** to design and implement a **RESTful api**.
- Created and maintained two clients using the **vuejs** framework, which interacted with the aforementioned api.
- Basic **system administration** of two servers, one for production and the other as a staging server.
- Design and implementation of the (simple) deployment of the two frontend clients, the backend services and the database.
- For a year I led a team of three, consisting of a junior programmer and a UX/UI designer.
